

Candace Barnes Design serves San Francisco and Marin County of California with elegant, timeless designs. An expert in interior design, interior architecture design, and landscape design, founder Candace Barnes has a seasoned eye for style and art.

When searching for those artistic finishing touches for a space, Candace often turns to her favorite art gallery in San Francisco, the Dolby Chadwick Gallery. There, she chose three pieces of artwork for a penthouse she was renovating for a client.

For the entryway, Candace selected an attractive oil on canvas by Tom Lieber—one of her favorite artists. As one travels straight into the penthouse, they are greeted by a large bronze statue by Stephen De Staebler. On either side of this vertical pillar are spectacular water views. When searching for this piece of artwork, Candace knew whatever she chose had to have strength enough to hold its own against the captivating scenery, to be the focal point grounding visitors in the room. Finally, hung in the dining room, is a contemplative painting by Edwige Fouvry.
